

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

About ten years ago the Dover Public Library began to gather and preserve material relating to New Hampshire. No extra expenditure of money was made in this direction until 1896, when the sum of one hundred dollars was taken from the bequest of two thousand dollars given by the will of Mrs. Elizabeth Hale Jaques, and used for the purchase of some increasingly rare town histories. Each year since then a few additions have been by purchase from the regular fund, and constant effort has been made to collect material that could be obtained by gift or exchange.

In 1902 the collection of local history made by Dr. John R. Ham came into the market. It represented many years' labor on the part of a keen and skilful collector. It included a full set of Dover directories, an almost complete file of New Hampshire registers, bound volumes of Dover newspapers, reports of societies, many volumes of bound pamphlets, curiosities of New Hampshire literature, rare old biographies and town histories. The collection, numbering nearly four hundred volumes, was purchased by Mr. E. R. Brown and presented to the Public Library.

A special room was set aside for the collection, and visitors from out-of-town, as well as our own towns-people, have gladly availed themselves of the privilege thus afforded for quiet study and research.

The star at the end of the entry indicates that the book has been presented by Mr. Brown.
